

**Styl-Comp Group** *passion and experience*

*is a world wide unique synergy between 3 highly specialized companies in custom precast concrete architectural and structural elements, we engineer, produce and erect. Since nearly 50 years the Group follows up designers and general contractors for the development and construction of their buildings and transfers experience and passion to the optimized architectural lead track.*

*Following 2011 Mutated Panels, designed by RM&P with hyperbolic panels, another concrete installation example of our capabilities in building with designer and clients. Again as co-sponsor of this intriguing installation, enTREEpic by Nemesi and Partners, side by side with Italcementi Group and pro-active in expanding the potential of concrete. That's why the Group has been selected for the complex façade construction of the amazing and branched surfaces of the Italian Pavillion at EXPO 2015, by suggesting unique engineering, production and construction solution.*

**Styl-Comp Group** *strength is achieved through the mutual and flourishing exchange between the following ccompanies, who follow the Group mission:skilled construction of client and designer ambitions blending technology and aesthetics.*

**Styl-Comp** *smart precast concrete*

*is the architectural and structural concrete precaster. Famous for several innovative patented technologies, has reached the top of the global precast market for the customized accuracy and finishing variety with MOLTEN STONE.*

**B.S.Italia** *innovative steel connections*

*is the global innovator of connection, lifting and supporting systems for precast concrete elements: engineered, patented, adjustable, simple and competitive solutions that guarantee a precise, safe and quick installation.*

**Techne** *enhanced molds & accessories*

*is dedicated to develop and produce special steel connections and molds of different materials, to give architectural and structural elements the correct shape and requested finishing.*

**Styl-Comp Group** *promotes also precast art through the magazine ELITE and supports university R&D. The Group had and still has the pleasure to work with many world wide well known architects and young emerging professionals as well, and delivers practical ideas for the international and environmental friendly building market.*
